

# THE INDIAN STREET FOODS

Learning more about the Indian street food

# Overview

## Objective

The objective of the street food finder app is to empower users to effortlessly discover and enjoy high-quality, reliable street food by providing them with real-time, personalized information about vendors, ensuring a seamless and engaging experience that prioritizes convenience, hygiene, and user satisfaction. Additionally, the app aims to build a loyal user base and establish strong partnerships with vendors, ultimately driving business growth and scalability through enhanced user engagement and innovative features.

## Competition

### Direct

### Indirect

## How is This a Real Problem?

Street food is a major part of the culinary culture in many cities, yet the lack of reliable information about vendor locations, quality, and hygiene standards leads to missed opportunities, dissatisfaction, and health concerns for consumers. This problem is especially acute in densely populated urban areas and tourist destinations, where choices are abundant but information is scarce..

## Target Segment

|                            |                   |
|----------------------------|-------------------|
| Urban Food Enthusiasts     | age 18-35         |
| Travelers and Tourists     | age 25-45         |
| Local Residents            | various age group |
| Health Conscious Consumers | age 25-50         |

## Total Addressable Market

- Urban Food Enthusiasts: 210 million
- Estimated Potential Travelers: 70-100 million
- Local Residents: 150-180 million
- Health-Conscious Consumers: 90 million
- **Total** estimated at around **400-500 million potential users**

# Competitive Research

## Hypothesis

An ideal street food finder app should provide a user-friendly, location-based platform that curates real-time information on street food vendors, focusing on hygiene, taste, and authenticity. It should meet the needs of both local food enthusiasts and tourists, offering reliable recommendations and enhancing the digital presence of vendors.

## Why Should We Solve It Now?

The demand for street food is increasing alongside the rise in domestic travel and tourism in India. With more people relying on digital platforms for recommendations, there is a growing need for a reliable app that can curate and rate street food vendors based on quality, taste, and hygiene.

# User Survey

## WHAT AND WHY SOLVE IT NOW?

Consumers struggle to find quality street food due to inconsistent information and lack of real-time updates, leading to missed culinary experiences. With the growing popularity of street food and increasing consumer expectations for digital convenience, there's an urgent need for a dedicated discovery app. The market remains untapped, offering a unique opportunity to establish a leading platform. Rising smartphone use and post-pandemic safety concerns make now the ideal time to launch this solution, meeting current demands and building a loyal user base.

[Deep Dive Inside](#)

### Pain Points

**Hygiene Concerns:** A significant number of users express concerns about the cleanliness of street food vendors, highlighting the need for transparency regarding hygiene standards.

**Difficulty Finding Vendors:** Users struggle to locate reputable street food vendors, especially in unfamiliar areas, creating demand for better discovery tools.

**Unpredictable Quality:** Consistency in food quality is a problem, leading users to seek reliable ratings and reviews before trying a new vendor.

**Lack of Information on Vendors:** Insufficient details, such as operating hours, specialty dishes, and pricing, frustrate users who prefer more informed choices.

**A survey of 50 users and in-depth interviews with 15 users are conducted to understand their needs and pain points**

[Survey Question](#)   [Survey Responses](#)

[1:1 Interviews](#)

## Summary of User Research:

Key challenges include lack of vendor information (45%), difficulty locating vendors (40%), and hygiene concerns (50%). Most respondents (70%) are interested in an app to discover street food, with top features desired being real-time vendor updates (65%), GPS navigation (60%), and Interactive map with popular food trails (explore curated food routes in your area)(55%). These findings highlight the need for a solution that offers comprehensive vendor details and enhances the street food discovery experience. Research underscores a market need for a tool that improves transparency, ease of discovery, & quality assurance in the street food sector.

# Problem

## What is the true problem?

People struggle to find reliable and hygienic street food options quickly, especially when time is limited.

**Why?** It's challenging to locate top-rated street food vendors when vendor availability is unpredictable and hygiene standards are unclear.

**Why?** There isn't enough real-time information about street food vendors, such as their operating hours, location, and hygiene ratings.

**Why?** Street food vendors often operate informally, making it difficult for existing apps and platforms to gather and update accurate data.

## Who's Facing This Problem?

25-50-year-old professionals, students, and food enthusiasts living in urban areas, particularly in Tier-1 & Tier-2 cities, Travelers & Tourists

## How do we know it is a real problem?

**Quantitative:** Surveys and data show that a significant percentage of people are willing to explore street food but face challenges in finding safe and reliable options.

**Qualitative:** In user interviews, many people complain about wasted time and effort in finding street food that matches their preferences, with particular emphasis on cleanliness and proximity.

## What is the value generated by solving this problem?

### For the business:

- Higher user engagement and retention.
- Increased vendor partnerships and potential for monetization.
- Stronger market position as the go-to platform for street food discovery

### For the target customers:

- Save time by quickly locating high-quality street food vendors.
- Enjoy street food with confidence in hygiene and availability.
- Reduce frustration and improve the overall dining experience.

### Jobs to be Done (JTBD)

**When I** have limited free time to grab a quick bite,  
**But I'm** frustrated by unreliable vendor availability and concerned about hygiene,  
**Please help** me find top-rated street food vendors nearby with real-time updates,  
**So I** can enjoy the best food without wasting time or worrying about cleanliness.

# Solution

## Possible Solution

### Real-Time Vendor Experience

This solution focuses on providing users with real-time, accurate information about street food vendors, ensuring they have up-to-date details on availability, location, and hygiene. It emphasizes the practical aspects of navigating street food options efficiently and safely

### Enhanced User Engagement and Loyalty

This solution centers on building a more engaging and rewarding experience for users, incorporating loyalty programs, exclusive offers, and social sharing options. It aims to increase user retention and build a strong, loyal customer base.

### How does this solution address the pain points?

**Locating Nearby Vendors Quickly:** Real-time updates on vendor locations allow users to find the best street food options without wasting time, providing a smooth and efficient discovery process.

**Ensuring Hygiene and Quality:** Offering hygiene ratings and other quality metrics helps users make informed decisions about where to eat.

**Navigating Easily:** GPS navigation directly guides users to vendors, minimizing the hassle of finding specific locations.

**Exploring Popular Dishes:** Personalized recommendations based on user preferences enhance the food discovery experience.

**Real-Time Updates:** Keeping users informed about vendor availability and special offers ensures they don't miss out on popular dishes or deals, enhancing satisfaction and reducing frustration.
